

POTENTILLA SOONGARICA BGE. (ROSACEAE), A NEW RECORD FROM IRAN

M. Abbassi, E. Moussavi and A. Paryab

Abbassi, M., Moussavi E. and Paryab A. 2006 08 01: *Potentilla soongarica* Bge. (Rosaceae), A new record from Iran. –Iran. Journ. Bot. 12(1): 73-74. Tehran.

Potentilla soongarica collected from Khorassan (Kalat) is reported as a new record from Iran.

Masoud Abbassi, Ebrahim Moussavi and Asghar Paryab., Khorassan Research Center of Agriculture and Natural Resources, P.O. Box 91735-1148, Mashhad, Iran.

گونه *Potentilla soongarica* بعنوان گونه جدید برای ایران

مسعود عباسی، ابراهیم موسوی و اصغر پاریاب

گونه *Potentilla soongarica* که از شمال شرق ایران، خراسان (کلات، لاین کهنه) جمع‌آوری گردیده است بعنوان گونه‌ای جدید برای فلور ایران گزارش می‌گردد.

Introduction

Reviewing different plants collected from Khorassan province, *P. soongarica* was identified which is reported as a new record from Iran.

Potentilla soongarica BGE.

Khorassan: Kalat, Laayen Kohneh, 1650 m., 2004.5.6, Paryab & Rejaee, 10636.

This species is distinguished from the other species of genus *Potentilla* by having glabrous carpels, basal leaves with 3-5 pairs of leaflets (pinnate leaves) and

subterminal style which in mature is shorter than carpel.

The geographical distribution of the species is Afghanistan, Tajikistan, Pakistan and China. (Schiman-Czeika 1969; Ovchinnicov 1975).
