

## ALLIUM DICTYOSCORDUM, A NEW RECORD FROM IRAN

**F. Matin**

Matin, F. 1990 02 11: *Allium dictyoscordum*, a new record from Iran.- *Iran. Journ. Bot.* 5(1): 7-8. Tehran.

*Allium dictyoscordum* collected from NE Iran is reported as a new record from Iran.

Farideh Matin, Department of Botany, Plant Pests and Diseases Research Institute, P.O. Box 1454-19395, Tehran, Iran.

گونه *Allium dictyoscordum* جدید برای ایران

از: فریده متین

گونه *Allium dictyoscordum* Vved. که از شمال شرقی ایران جمع آوری گردیده به عنوان گونه جدیدی برای فلور ایران گزارش می گردد.

**Allium dictyoscordum Vved.**

Semnan: Shahrud, Khosh-Yeilagh protected area, Zardabeh, 1550-1640 m, Termeh, Mousavi & Tehrani 39502-E; Gorgan: Golestan forest, road to Behkadeh, 1250-1300 m, Wendelbo & Foroughi (det.: P. Wendelbo); Gorgan: c 100 km NW of Gonbad-e Kavus, near Maraveh-tappeh, 500 m, Assadi & Maassoumi (det.: P. Wendelbo).

*Allium dictyoscordum* which is from the section *Allium*, is a new record from Iran. The closest locality to the Iranian gathering is in Turkmenistan of the USSR, where the species was originally described from and was indicated as endemic by Wendelbo (1967, p. 48) in *Flora Iranica*.

This species is rather frequent in part of the *Artemisia*-step in Golestan forest, with leaves canaliculate, and distinctly scarbird-margined (in dried state), white flowers with greenish stripes and purplish anthers.

**Acknowledgements**

Thanks are due to Mr. H. Keshvar-Gir, the artist of the Plant Pests and Diseases Research Institute for preparing the illustrations.
